

Directorate-General for Translation

Is machine translation useful for translators?

The technological environment in the European
Commission DG Translation

Josep Bonet
Head of the IT Unit
Translingual Europe
Prague, 14-05-2009

EUROPEAN
COMMISSION

Commission translators have at their disposal

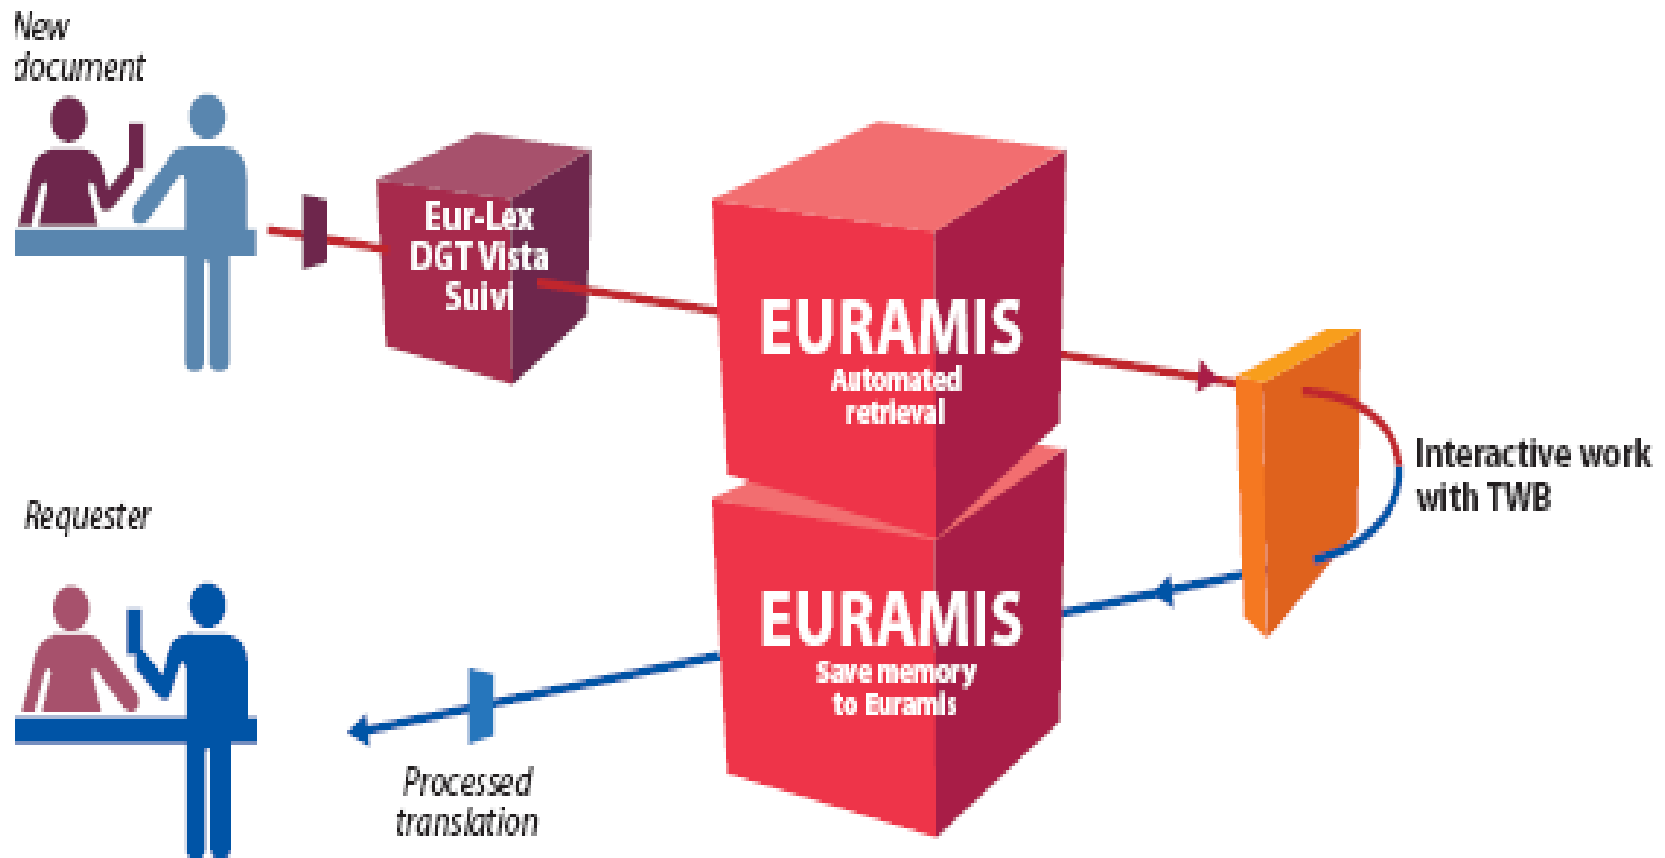

■ Linguistic tools

- huge translation memory (Euramis, more than 300 million segments + supporting services)
- local workbench (local memory, SDL TRADOS)
- huge terminology database (IATE, partly available to the public)
- metasearch engine to query several databases simultaneously (Quest)
- voice recognition
- machine translation system (ECMT)

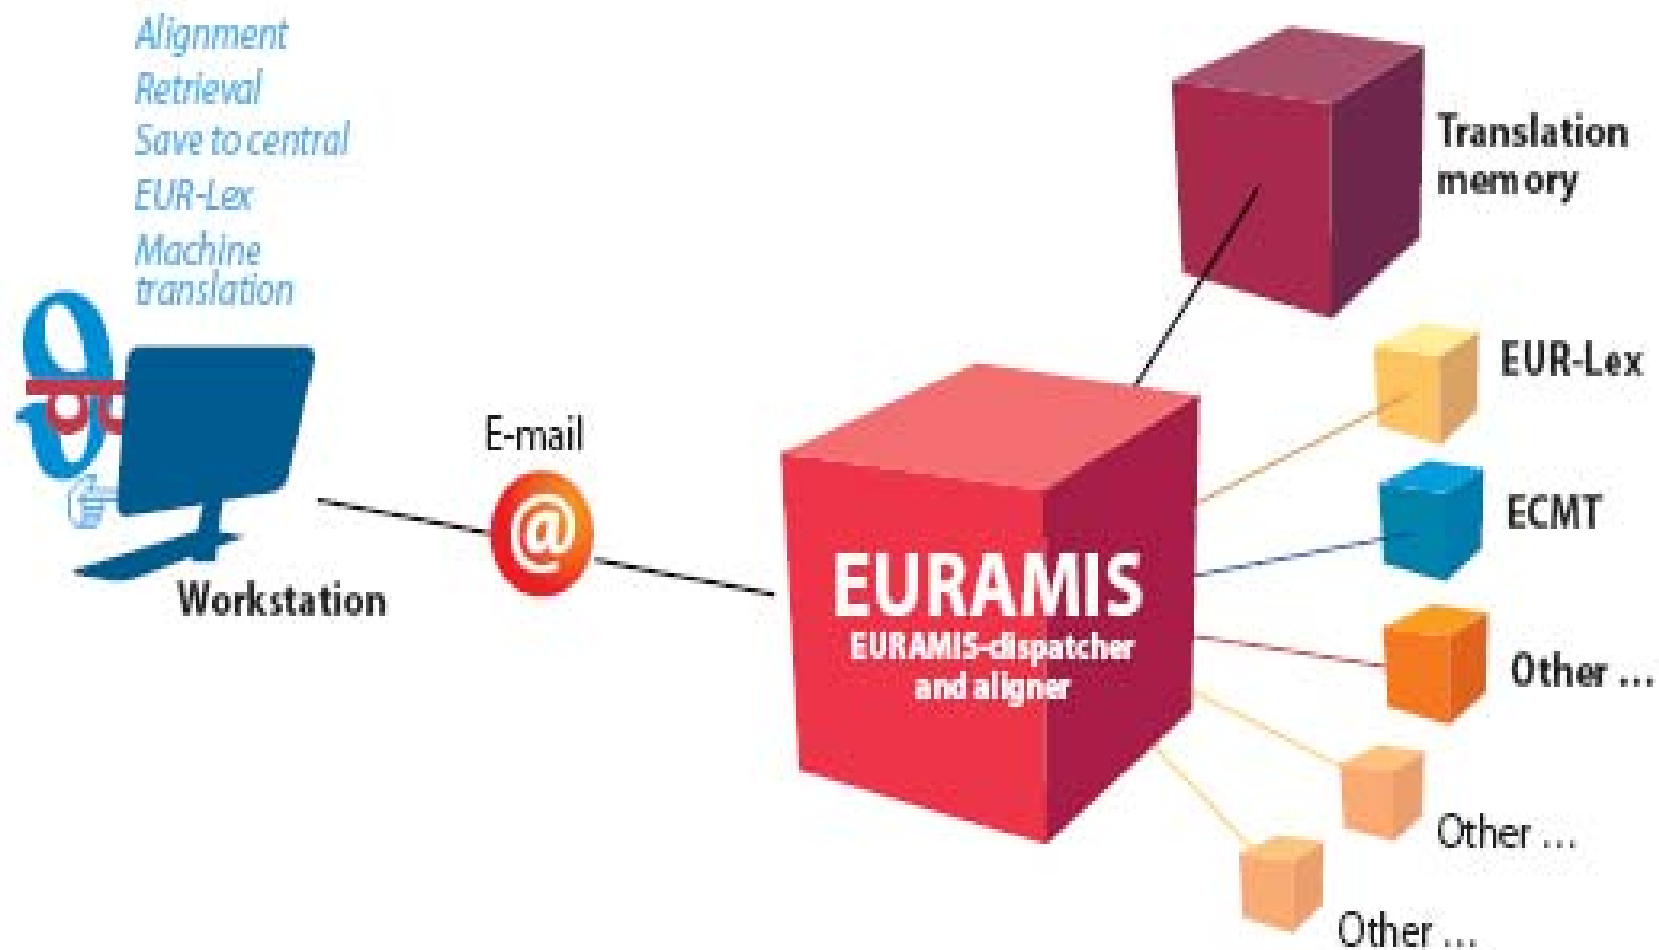

and

- administrative tools (Poetry, Suivi)
- document management tools (Dossier Manager, DGT-Vista)
- electronic documentation (Eur-Lex, Multidoc, electronic dictionaries, other EU and international institutions)
- internet

Machine translation

The *Machine translation* feature enables the user to translate a selected document into certain official EU languages.

To translate a selected document:

1. Select the document you wish to translate from the result list. The selected document with the corresponding document number in the top left-hand corner will be displayed.
2. Choose the following option to translate the document, as shown below:

Document 242644-2008-EN

20/09/2008 S183 European Communities – Services – Design contest notice
I, II, IV.

F-Vitry-sur-Seine: architectural services for buildings
2008/S 183-242644
DESIGN CONTEST NOTICE

SECTION I: CONTRACTING AUTHORITY/ENTITY

I.1) **NAME, ADDRESSES AND CONTACT POINT(S):**
OPHLM de Vitry-sur-Seine, 4, rue de Burnley - BP 98, F-94400 Vitry-sur-Seine, Tel. (33) 147 18 11 20, Fax: (33) 146 81 71 28.
Internet address(es):
Further information can be obtained at: As in above-mentioned contact point(s).
Further documentation can be obtained at: As in above-mentioned contact point(s).
Projects or requests to participate must be sent to: As in above-mentioned contact point(s).

Statistics

Synchronous requests

Asynchronous requests

- Increased preference for online translations, through web interface and webservices (faster and directly available on screen)
- In line with market trends evident in other MT systems available on the Internet

Future of MT

- MT: extra CAT-tool for translators, but also necessary to support multilingualism in Europe
- MT can be used by:
 - readers for gisting
 - translation and localisation service providers to increase productivity
 - citizens to search across countries/languages
- Current ECMT system : rule-based
 - labour-intensive, expensive
 - cost difficult to justify (low quality)
- Current trend: statistical machine translation (SMT)
 - cheaper; baseline already with minimum resources
 - learning from human translations
 - larger corpora needed

DGT and MT: prepare the future

- Review MT needs in the Commission
 - MT integrated in translation workflow (DGT)
 - if no match, use MT?
 - paraphrasal MT?
 - post-edition for freelance translators?
 - MT available for other DGs (staff, webservice for citizens)
 - all languages, gisting tool
- Two important developments:
 - Multilingualism policy: Commission communication (18/09/2008) + Council resolution on a European strategy (21/11/2008)
 - Funding for research (7th R&D Framework Programme) and innovation (CIP ICT Policy Support Programme) in language technologies and machine translation - DG INFSO

DGT and MT: prepare the future (cont'd)

- **MT strategy for DGT**
 - exploring alternatives in the language technology watch activity (LTW) of DGT
 - in-house testing of SMT
 - conferences, desk research
 - collaboration with other DGs (JRC, DG INFSO)
 - data providing (TMs on JRC website, updates)
 - *Euromatrixplus* (providing data and/or evaluation resources)

DGT and MT: prepare the future (cont'd)

- **Contributing to MT strategy for the Commission**
 - inter-service discussions on MT to assess needs and propose strategy
- **Outcome:**
 - action plan, so that Commission and DGT are ahead of the developments

Directorate-General for Translation
